Umbiombu

CSR Tracking Platform
by NTT DATA

NTT DATA SAP Business Unit

products & assets

As a reference partner in SAP, we are part of the SAP Partner Edge Build program, which allows us to develop our own assets that respond to the needs of our clients on SAP Cloud Platform through SAP Leonardo. All this aimed at business areas such as Human Resources, Finance or Logistics and Transportation and in SAP ERP, SAP HANA, S / 4HANA, SuccessFactors, Hybris, Ariba and Concur solutions.

What is it?

Umbiombu is a Corporate Social Responsibility platform aimed at enabling companies to monitor activities linked to the UN's sustainable development objectives.

Umbiombu offers companies the possibility of having a 360° vision of all activities and projects related to the UN's sustainable development objectives in a single application.

It allows to follow up the defined strategy going down to the level of objectives, programs and reaching the tasks allowing a traceability of who and when the different tasks have been carried out. In addition, it allows to make the economic pursuit of the initiatives and to assign people or external organizations to projects for a greater control.

It encourages employee engagement with a volunteer portal and allows employees to vote and comment on various initiatives and monitors the main Environment, Climate & Governance KPIs of the company.

What advantages does it have?

It offers in a **single platform all the functionalities needed to turn businesses into sustainable enterprises** committed to the UN's sustainable development goals

What business process does it cover?

It **provides a 360° view** of all activities related to the UN's sustainable development goals.

What benefits does it bring?

- Traceability and auditability of information.
- 360° vision of all the activities.
- Employee engagement.
- Possible connection to backends for further automation.
- Facilitates information reporting.
